

SPECIFICATIONS

Type: Pendant

Materials:

Laser sintered polyamide (SLS) shade.
Anodized aluminum alloy body and canopy.

Cord length: 84" (210 mm)

*custom length available upon request.

LED MODULE

Input: 6.4 W
Voltage: 120 V
Dimming: Phase
Lumen output: 500 lm
Color temperature: 2700 K
CRI: 93
Lifespan: +70,000 hrs

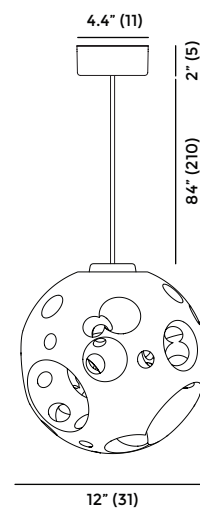

WARRANTY

5 years limited warranty

DIMENSIONS

DESCRIPTION

Bubbles are one of the most inspiring natural forms, simultaneously possessing a spirited innocence and evoking the most radical structures in architecture and science. In designing .015, known as the MoonLight, PARTISANS explored the formal process of employing bubbles to create voids within a traditional spherical pendant light.

The result is a glowing orb reminiscent of a lunar landscape.

DESIGNER

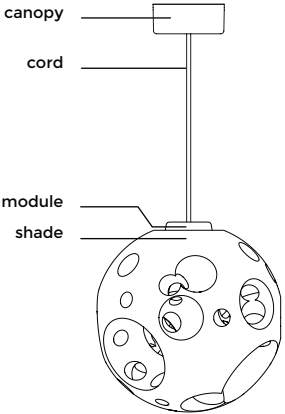

PARTISANS is an award-winning architecture studio that works at the intersection of design and programming, technology and craftsmanship, invention and activation, politics and culture. We are a diverse team of architects and thinkers fighting for a cause: high-performance design that strives to make the improbable possible. From internationally acclaimed saunas, restaurants, and arts festivals, to train stations, private homes, lighting products, and high-rises, the wide-ranging scope of our projects defies categorization and clichés.

PARTISANS uses new-world technologies in the service of old-world craftsmanship to create striking, context-specific design solutions. Our designs are always digitally modeled with the most advanced software and prototyped to ensure feasibility and constructability. With every project, we bring an appetite for invention. Through research and development, our team embraces constraints and turns them into unexpected opportunities for artful innovation.
