SPECIFICATIONS

Type: Pendant

Materials:

- Laser sintered polyamide (SLS) shade.
- Anodized aluminum alloy body and canopy.

Cord length: 84" (210 mm)

*custom length available upon request.

LED MODULE

Input: 6.4 W

Voltage: 120 V

Dimming: Phase

Lumen output: 500 lm

Color temperature: 2700 K

CRI: 93

Lifespan: +70,000 hrs

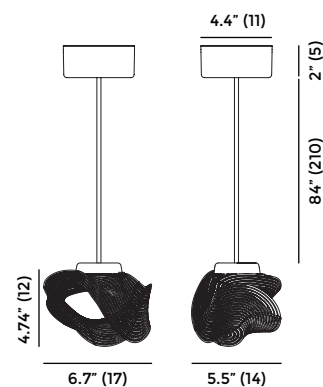

WARRANTY

5 years limited warranty

DESCRIPTION

The idea behind the design was to create a three dimensional object that represent motion frozen in time. The dynamic nature of the shade makes it look like a living entity that was paused for a second in its graceful flight. The combination of perfect geometry and organic flow creates an intriguing silhouette that provides a new exciting perspective from every angle. The alternative orientation of the shade evokes the sense of curiosity and surprise which makes it a centrepiece of any modern interior.

DESIGNER

Evgeniia Balashova is a Russian born jewellery designer and maker based in Scotland. Eve received traditional training in painting and drawing in Russia and continued her studies in metalwork at The Glasgow School of Art graduating in 2016. She started experimenting with 3d printing in her final year at GSA, concentrating on a contrast between smooth flowing curves and strict geometry. She has been exploring the possibilities of 3D printed nylon ever since, playing with scale, textures, tactile and kinetic qualities of the material.

Evgeniia's metalworking skills allow her to merge 3D printed nylon with Sterling silver and gold, creating unique compositions and colour combinations. She presented her intriguing collection at the prestigious Goldsmiths' Fair in London in 2017 and she continues to exhibit regularly in the UK and abroad.
